

RecruitConnect OneHR™

Onboarding Workflow — Per-Employee Audit Trail

Org: RecruitConnect Nigeria Ltd (RC) • Trigger: employee.created • Workflow: a3776dae • Generated: 03/09/2026, 09:12:06 • MSSQL onehr_v2

Per-employee separate • Auto-verified via Documents/Assets/Sessions • Who logged in per step • Timing/IP/UA • Screenshots per role

1. Workflow Definition — Onboarding

Name: Onboarding Workflow | Trigger: employee.created | Active: true | Condition: {"field":"status","op":"=","value":"active"} | Escalation: {"after_hours":48,"to":"org_admin"}

#	Step	Type	Assignee	Auto Source	SLA
1	Offer & E-Sign Verified HR verifies CONTRACT document verified (auto)	approval	hr_admin	Offer: CONTRACT verified	24h
2	Documents Verified ID, Bank, Certificates verified (auto)	approval	hr_admin	Docs: any verified	24h
3	IT Setup & Asset Create email, assign laptop, provision access	task	hr_admin	Asset assigned	48h
4	Orientation Completed HR intro, Policies, Tour - manager confirms	approval	manager	Clock-in exists	24h
5	Buddy & Training Assigned Assign mentor, enroll LMS path, verify training	task	hr_admin	Training completed	72h
6	Probation Goals Set 30-60-90 day KPIs, manager sets goals	approval	manager	Review exists	24h

Per PRD §24: Checklist ! Documents ! IT ! Buddy ! Training ! Probation. Auto-verified via onboarding.service evaluateAutoSteps() reading Document/Asset/WorkSession/LearningEnrollment/PerformanceReview. Toggle PATCH /onboarding/:id/step/:id persists per employee in onboarding_progress.

2. Involvements — Who Logged In & Pages Attended

Each onboarding step requires a specific role to log in via /login (POST /auth/login !' JWT + AuditLog) then navigate to /onboarding and handle the step. Below are role-based login flows and pages.

hr_admin — hr@recruitconnect.ng / Test@123

Flow: /login ! HR Dashboard /hr ! Onboarding /onboarding ! Documents /documents ! Assets /assets ! Training /learning

Handles: Steps 1,2,3,5 (Offer, Docs, IT, Buddy)

RBAC: hr_admin permissions via RbacGuard + ROLE_PERMISSIONS ! AuditLog POST /auth/login + GET /onboarding/:id + PATCH /onboarding/:id/step/:stepId

Screenshot: Login as hr@recruitconnect.ng !' HR Dashboard /hr

Screenshot placeholder — will auto-embed real PNG if /tmp/login-*.png exists

Email: hr@recruitconnect.ng • Password: ****

Sign in ! Dashboard ! Onboarding

Role: hr_admin • RBAC: audit + onboarding

manager — manager@recruitconnect.ng / Test@123

Flow: /login ! Manager /manager ! Onboarding /onboarding (team) ! Performance /performance

Handles: Steps 4,6 (Orientation, Probation Goals)

RBAC: manager permissions via RbacGuard + ROLE_PERMISSIONS ! AuditLog POST /auth/login + GET /onboarding/:id + PATCH /onboarding/:id/step/:stepId

Screenshot: Login as manager@recruitconnect.ng !' Manager /manager

Screenshot placeholder — will auto-embed real PNG if /tmp/login-*.png exists

Email: hr@recruitconnect.ng • Password: ****

[Sign in !](#) [Dashboard !](#) [Onboarding](#)

Role: hr_admin • RBAC: audit + onboarding

org_admin — admin@recruitconnect.ng / Admin@123

Flow: /login !' Command Center /hr !' Onboarding /onboarding (all) !' Settings /settings

Handles: Escalation + Finance (payroll) — also sees all onboarding via RBAC *

RBAC: org admin permissions via RbacGuard + ROLE PERMISSIONS ! AuditLog POST /auth/login + GET /onboarding/:id + PATCH /onboarding/:id/step/:stepId

Screenshot: Login as admin@recruitconnect.ng !' Command Center /hr

Screenshot placeholder — will auto-embed real PNG if /tmp/login-*.png exists

Email: hr@recruitconnect.ng • Password: ****

Sign in !' Dashboard !' Onboarding

Role: hr admin • RBAC: audit + onboarding

employee — employee@recruitconnect.ng / Test@123

Flow: /login ! Employee Home /employee (clock prompt) ! Onboarding /onboarding (own only)

Handles: Views own onboarding progress only (employee:read:self)

RBAC: employee permissions via RbacGuard + ROLE PERMISSIONS !' AuditLog POST /auth/login + GET /onboarding/:id + PATCH /onboarding/:id/step/:stepId

Screenshot: Login as employee@recruitconnect.ng !' Employee Home / employee (clock prompt)

employee (clock prompt)

Email: hr@recruitconnect.ng • Password: ****

[Sign in !](#) [Dashboard !](#) [Onboarding](#)

Role: hr_admin • RBAC: audit + onboarding

Role: `nr_admin + RBAC.admin + onboarding`
 Implemented: `capture_onboarding_screenshots.ts` does steps 1-4 (`chromium.launch !' page.goto /login !' fill hr@ !' click Sign in !' waitForURL !' goto /onboarding !' screenshot`). Run: `npx tsx apps/api/src/prisma/capture_onboarding_screenshots.ts` after `npx playwright install chromium`. PDF auto-embeds via `tryEmbed()` if `doc.image()` if `/tmp/*.png` exists, else placeholder (step 6). Verify: `GET /onboarding/id`. Get: `audit-logs?search=onboarding`. `GET /workflows/id/runs` (step 7).

3. Per-Employee Onboarding Instances — Deep Audit

Total: 3 instances • Each employee has separate onboarding_progress row • WorkflowInstance per hire • 6 approvals per hire

Hire: RC-000005 • Test Engineer Fixed2 • • Branch:

Instance f364bbc4 • employee/f232d673 • Status:approved • Steps:6/6 • Workflow:Onboarding Workflow

5. How to Capture Real Screenshots (Per Role)

- 1. Start stack: `npm run dev (API 3001 + Web 3000)` • Ensure DB seeded via `npx tsx apps/api/src/prisma/seed.ts + enterprise_seed.ts + rbac_seed.ts`
- 2. Install Playwright: `npm i -D @playwright/test && npx playwright install chromium`
- 3. Create script: `const {chromium}=require("playwright"); const b=await chromium.launch(); const p=await b.newPage(); await p.goto("http://localhost:3000/login"); await p.fill('[placeholder="Email"]', "hr@recruitconnect.ng"); await p.fill('[placeholder="Password"]', "Test@123"); await p.click('button:has-text("Sign in")'); await p.waitForURL("*/hr"); await p.goto("http://localhost:3000/onboarding"); await p.screenshot({path:"/tmp/onboarding-hr.png", fullPage:true});`
- 4. Repeat for `manager@`, `admin@`, `employee@` — each lands on `/manager`, `/hr`, `/employee` respectively per `login/page.tsx:35` role! dashboard mapping
- 5. Embed in PDF: `doc.image("/tmp/onboarding-hr.png", 36, y, {width: 523})` — `pdfkit` supports PNG/JPEG
- 6. Current PDF uses placeholder boxes (`drawPlaceholder`) for offline build; replace with `doc.image()` when screenshots captured
- 7. Verify audit: `GET /v1/onboarding/:id !'` steps with `autoVerified`, `GET /v1/audit-logs?search=onboarding !' who/when/IP`, `GET /v1/workflows/:id/runs !'` approvals
